DocOut™ Software PrintServer

IBM AIX platforms can be used to connect LAN printers to the IBM environment.

Data stream conversion

DocOut AIX™ converts host data (ICDS or IPDS) to PCL, PostScript or PDF. DocOut AIX™ allows for multiple host connections using TCP/IP.

The output data from DocOut AIX™ can be configured to match your printing requirements. Page laser printers are supported via PCL5/5c or Postscript output. Inkjet and matrix printers are supported via PDF output. DocOut AIX™ contain options to support the extensive input and output facilities of MFP's and Digital copiers. Documents can be generated in PDF format for archiving or distribution over the Internet.

Support of monochrome printing and color printing with the use of outline fonts DocOut AIX™ meets today's requirements for high volume/quality print. Optimum reliability is maintained with extensive end-to-end control of the printing process.

Easy installation and configuration

Installation and configuration of DocOut AIX™ can be achieved with the supplied PrintGuide™ program which acts as both Configuration Wizard, Status Monitor and Maintenance Tool.

Meeting your specific requirements

DocOut AIX™ is a Printer License based Server Software that can be matched to the exact number of printers required. More than 250 simultaneously sessions per installation are supported at various PPM ranges allowing you to configure DocOut AIX™ to exactly suit your printing requirements.

Free 30-day download

Register and download DocOut AIX™ for a free 30-day evaluation.
