

IGP-Kit

Turn your HP LaserJet into an IGP® Printer

What is the IGP-Kit

The IGP-Kit is a plug-in emulator for the HP LaserJet printer family.

Why use the IGP-Kit

The MPI Tech IGP-Kit has been developed specifically to provide users with a wider choice of printers for applications that generate the IGP print language.

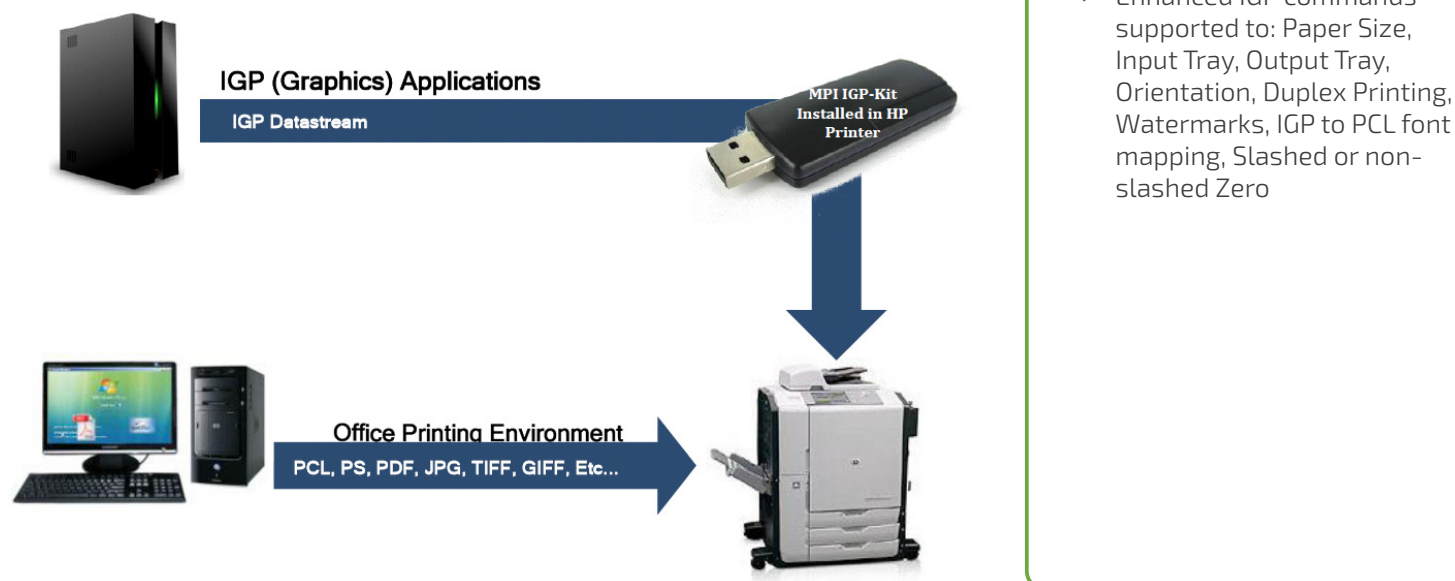

How to expand the printer capabilities

The IGP-kit can expand the capabilities of your HP Laserjet printer, enabling it to support IGP encoded print streams without the need for potentially expensive application re-writes.

The Solution

The IGP-Kit is the perfect solution for your IGP needs. Simply plug the small memory module into your HP LaserJet Printer or MFP and the MPI Tech enhanced IGP language will automatically be installed.

The IGP-Kit supports all commonly used IGP commands. MPI Tech's unique command extensions allow users to leverage laser printer features not generally available on impact printers. The MPI Tech IGP-Kit will allow you to take advantage of multiple input/output trays, various paper sizes, different print orientations and print in simplex or duplex mode.

Key features

- ✓ Embedded IGP language support on HP LaserJet printers
- ✓ Ideal replacement of costly impact IGP printers
- ✓ Take advantage of Laser print quality from your IGP applications
- ✓ Supports Barcodes, Images (logos) and Overlays
- ✓ Seamlessly recognize and process IGP commands
- ✓ Automatic switching between PCL, PostScript, PDF and IGP applications
- ✓ Enhanced IGP commands supported to: Paper Size, Input Tray, Output Tray, Orientation, Duplex Printing, Watermarks, IGP to PCL font mapping, Slashed or non-slashed Zero

Take control of your document life-cycle management
