### The 2013 version of PSS is now available.

Print SubSystem™ MVS, PSS is a printing subsystem for z/OS and OS/390. PSS mainframe software provides an AFP, XML and line data printing solution using PCL and PostScript printers.

The AFP to PDF conversion output (z/OS) may either be written to disk or distributed using e-mail or automatically initiated File Transfer.

PSS is simple to install and use, which also provides a reliable method of host generated PDF and e-mail output as an add-on to your printing solution.
