

PSS VM 7.16 announcement

New Mainframe Software **Print SubSystem VM 7.16**

"AFP printing to PCL and PostScript"

Version 7.16
*Object Container Update with
additional features and fixes*

The 2013 version of PSS is now available.

Print SubSystem™VM, PSS is a printing subsystem for VM. PSS mainframe software provides an AFP, XML and line data printing solution using PCL and PostScript printers.

PSS/VM provides PCL and PostScript output and printing. PDF is only produced in combination with the windows server solution DocOut.

PSS is simple to install and use, which also provides a reliable method of host generated printer ready output as an add-on to your printing solution.

More information can be found here: <https://www.mpitech.com/content/print-subsystem>

Key Features for PSS VM 7.16

- ✓ Compliant with all z/VM levels
- ✓ CP spool printing
- ✓ Input format in AFP, XML and Line Data
- ✓ Support for outline font
- ✓ Support for full colour
- ✓ Multipage PDF support
- ✓ PDF1.7 support
- ✓ Output in PCL and Postscript

PSS VM 7.16 is available from November 30th, 2013

Important dates

PSS 7.16 is now withdrawn from marketing. MPI Tech will maintain support and warranty service on PSS 7.15 for customers holding valid maintenance until end of June 2014. From December 2013 all error corrections will be performed on PSS 7.16 and will be offered to Customers, holding maintenance, for any corrective action.

Upgrade for current users

Current users of PSS holding a valid maintenance contract will be offered a free upgrade to PSS 7.16 with similar options. PSS 7.16 can be installed 'on top' of the already running PSS installation hereby maintaining existing printer definitions and configurations. An upgrade from version 7.14 or newer to version 7.16 will not require a new license key for the installation.

PSS 7.16 accumulates the delivered bug fixes from PSS 7.15 thereby improving the stability and performance of the application.
