

Release note - MPI Tech PrintServer

Version: S80 654.060

Release date: June 15, 2017

The new generation of MPI Tech EasyCom® PrintServers is now available

The EasyCom® 5 PrintServer services a single printer connection to a matrix printer. EasyCom® 5 replaces the EasyCom® III PrintServer and introduces some new features.

The design is the well-known design of the LinkCom® 5 that has been adapted to host the well-known EasyCom® III features.

New features in version S80 652.020

New features introduced in first release

- ✓ Supports IPv6 and IPv4 both for host, printer and the box itself.
- ✓ 1 Gigabit support on the LAN socket.
- ✓ Support for printer connection via USB and LAN

Support and setup

- ✓ Please note that as the EasyCom 5 supports IPv6, and has other new settings. Setup must be performed through PrintGuide version 065.490 (or newer). This is currently the only version of the PrintGuide tool that can communicate with EasyCom 5. PrintGuide version 065.490 is backward compatible and supports both the new LinkCom 5 as well as previous versions of LinkCom and DocOut.
