

Release note

LinkCom 5 M

Version: S80 656.070, July 5., 2019

New Features

- Support for SNMP host printing. LinkCom 5 now supports simple SNMP print from host.
- Support for adding a subset of Define Group Boundary parameters to output data stream. Contact MPI Tech Support for more details.

Corrections

General:

- Possible to assign customized TCP/IP hostname to LinkCom 5.
- Pre/Post/Replacement strings can be used from imported files.

IPDS:

- Improved support for IOCA FS11 JPEG objects.
- Correct handling where host attempts to use a font that has not been previously declared.
- Space characters as Dynamic spacing is now supported.

ICDS:

- Print direction after overlay inclusion for PCL output corrected.
- Color correction for PS output when overlay is wrongly printed with wrong color. Correction ensures that color is selected before printing overlay.

Concern

Replaces earlier release S80 656.060 and will be introduced for all future orders.

Customers with valid maintenance can update to the newest version of the firmware.

Please contact [MPI Tech Support](#) for further information.
