

Release note

LinkCom III S

Version: S80 602.210, January 15, 2015

New features and functionality

None

Corrections

SCS:

- Default cpi value implemented for CPI/HMI in FSL Y10,7. Print will default to true cpi if unspecified.

IPDS:

- The routine used to support Adobe Type 1 downloaded fonts corrected for very small and very large fonts.
- Spacing corrected for fonts with unspecified spacing.
- Font spacing and size corrected for 240 dpi fonts when used for PCL with 600 dpi output.
- Skip transparency masks or other unsupported image content. Thus presenting the real image (without transparency mask) instead of the transparency mask (as bilevel/black image).
- PostScript correction of edge to edge support.
- Corrected format with Pattern Resolution used for 600 DPI printing.

Concern

Replaces earlier release S80 602.200 and will be introduced for all future orders.

Customers with valid maintenance can update to the newest version of the firmware.

Please contact [MPI Tech Support](#) for further information.
