Automatic routing of electronic documents

ScopMaster contains features to index, store, search, retrieve and view your electronic documents while maintaining document original. ScopMaster supports multiple platforms and can be easily integrated into the existing workflows delivering client reassurance and that personal touch.

ScopMaster manages all phases of the document management processes without compromising confidentiality or security. Automatic routing is enabled through indexing of files from any application, making it easy for users to search through copious amounts of data, quickly finding the relevant files, safe in the knowledge that the integrity of the documents have been maintained.

ScopMaster improves response times, lessens errors and dramatically reduces costs.

Multiple input format processing

Any document can be submitted to ScopMaster, which will detect its format and then process based upon its characteristics or predetermined requirements.

Searching

Page search several documents simultaneously, by name, date, annotations or multi criteria search.

Automated Document Filing

Allows automatic filing of documents using a user group rights as defined in AD, LDAP....

Data access security
