

Release note

LinkCom 5

Version: S80 652.050, December 27, 2016

New features and functionality

This version introduces new and improved features that eases the usability of the LinkCom 5 PrintServer.

- Multi session printing allows up to 10 simultaneous IPDS print sessions. Multi session printing is enabled with an enhanced license key.
- Multi session printing allows up to 10 simultaneous SCS or DCA print sessions. Multi session printing is enabled with an enhanced license key.
- Configuration via Ethernet over USB (OTG port) enables direct configuration of a LinkCom 5 device without a network connection
- IPv6 support
IPv6 support has been tested on a Windows 2008R2 IPv6 network with a DHCP server using Stateful configuration where LinkCom 5 and destination printer are targeted using their IPv6 link-local addresses.

Concern

Replaces earlier release S80 652.050*02 and will be introduced for all future orders.

Customers with valid maintenance can update to the newest version of the firmware. Update guidelines will be available in week 1, January 2017.

Please contact [MPI Tech Support](#) for further information.
